The rugged BP333 from Xtegra[®] Tegrabond[®] is the world's top-selling manually operated dispenser for water activated tape in the industry.

TEGRABOND[®]

TEGRABOND®

BP333

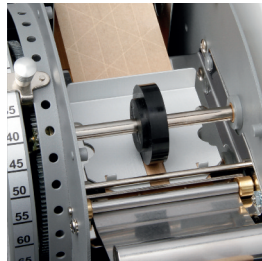

Manual Water Activated Tape Dispenser

Reliable and user-friendly, it has fifteen manually set tape lengths and is ideal for use where there is no convenient electrical power supply or where greater portability is required.

The BP333 is built to last and engineered to provide many years of consistent, reliable performance. This dispenser is perfect for light to medium usage and is compatible with either reinforced or non-reinforced water activated tapes.

Superior Mechanics and Guillotine Blade
Delivers clean, even cutting of reinforced and non-reinforced tape

Rugged Engineering
Steel side frame construction ensures durability and long life.

Fast Length Selection
Quickly choose one of 15 preset tape lengths on clearly marked dial.

Applications

- > Sealing of up to 100 cartons per day/8hr shift.
- > Packing stations without access to electricity.
- > Frequent relocation of dispenser required.

Accessories

- > Top Heater Accessory (requires electricity)
 - Heats water to optimise tape's adhesive properties
 - Excellent for use in chilly shipping environments
